BULL SOLANA

Collaboration is the new competition

LITEPAPER V1.0

Welcome To Our Community

Bull Solana is a community token built on the Solana blockchain ecosystem with a limited supply of 10 billion tokens.

Our Ecosystem:

\$BULL is a project with the goal of becoming the largest operational platform in DeFi and the crypto-space as a whole, building a competitive crypto ecosystem.

LITEPAPER V1.0

Solana Blockchain

Powerful for developers. Fast for everyone.

Fast Forever:

Solana is the fastest blockchain in the world and the fastest growing ecosystem in crypto, with thousands of projects spanning DeFi, NFTs, Web3 and more.

LITEPAPER V1.0

Meme Ecosystem

Meme coin originates from internet memes or other humorous characteristics. The meme ecosystem comprises the staple of the broader crypto ecosystem. The crypto community love meme, therefore building Bull Solana to one of the industry's favorite is our core mission.

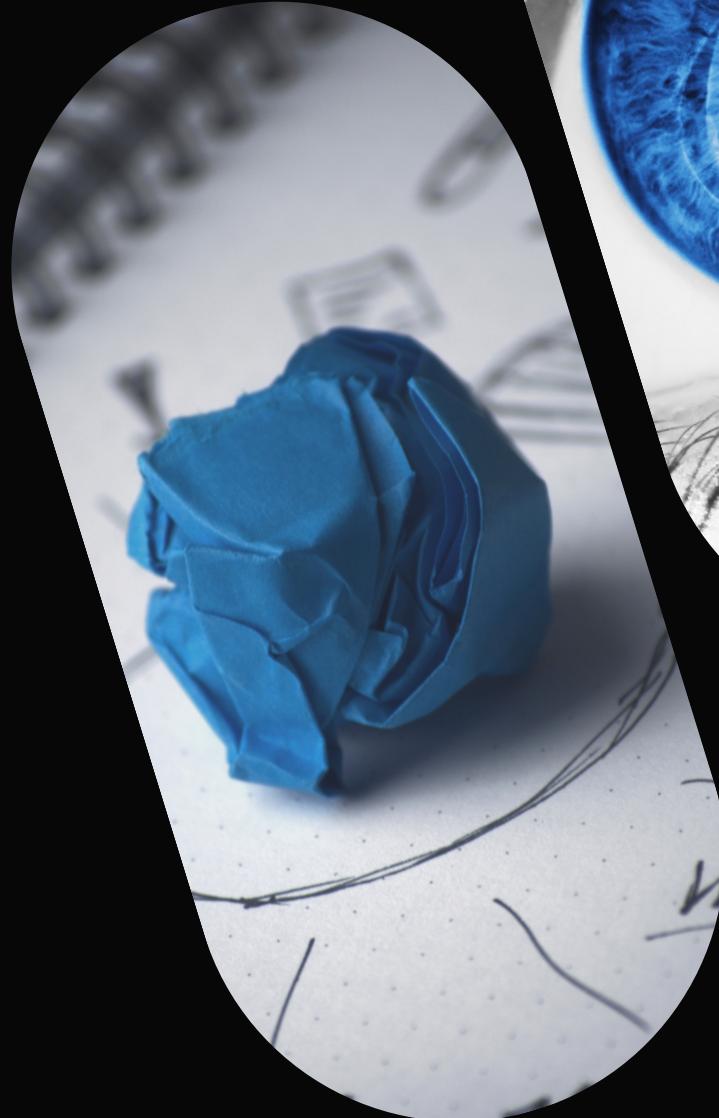

Bull Solana plans to bring faith and the explosion of cryptocurrencies on the Solana blockchain.

Collaboration is the new competition

The Harvard Business Review has an interesting study "Collaboration is the new competition" by Ben Hecht, who says, "While collaboration is certainly not a foreign concept, what we're seeing around the country is the coming together of non-traditional partners".

The meme crypto space has made this undeniable as we see in the 2021 crypto space explosion.

Vision & Mission

About Vision

We aim to become a Solana ambassador for positive news and also serve as a bull eye, watching over every other token and NFTs in the blockchain.

About Mission

Our mission is to build a cooperative community and social token on the Solana blockchain. We're building a system that helps users get easy access to the crypto world. In the long run, we will be building easy-to-understand services that anyone (crypto experts/novice) can use to trade tokens and NFTs on Solana, learn about the blockchain industry, and DeFi, while avoiding dangerous schemes within the space.

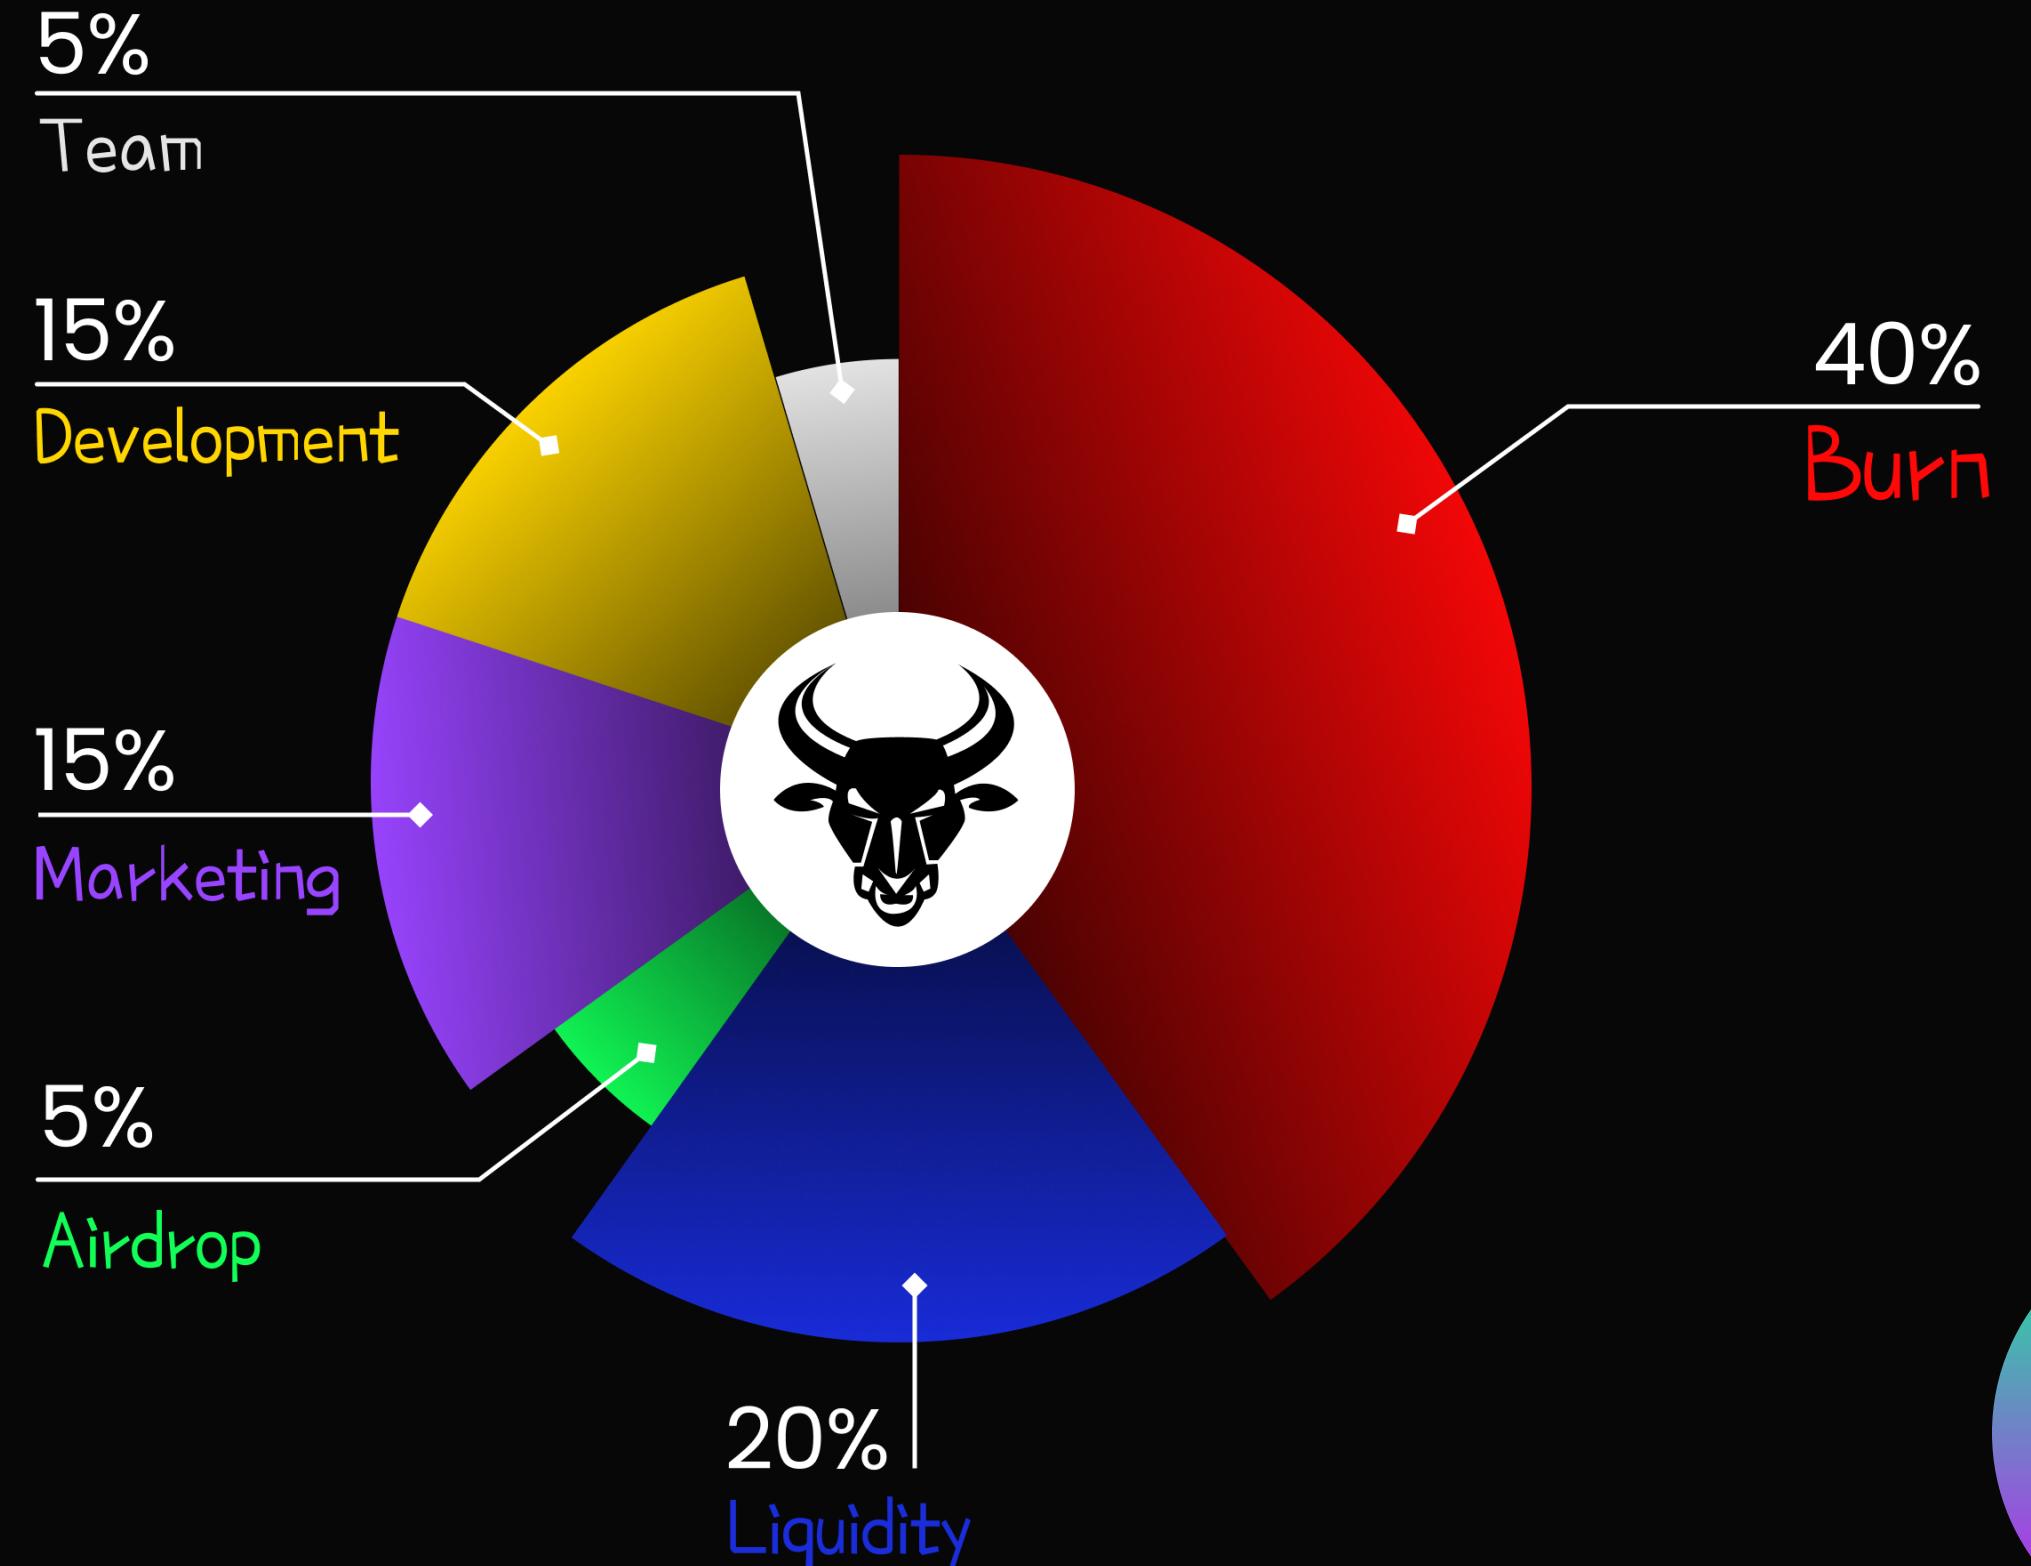

LITEPAPER V1.0

Token Distribution

10,000,000,000 total supply

5% monthly token burn totalling 40% of the supply.

Team will receive 30% of their distribution at launch while 70% will be vested over burn duration.

LITEPAPER V1.0

ROADMAP 2022

Q2

- Token Launch
- Website launch
- Feasibility breakdown
- Coingecko/Coinmarketcap listing
- Marketing/Partnership
- Introducing Bullwatch

Q3

- Launch Bullwatch
- Airdrop distribution
- Team development
- Contest and games
- NFT launch
- P2E game development

Q4

- UI/UX redesign
- Mockup design
- Beta Test
- Community engagement
- Public test
- Bullswap Launch
- Update...
